INTRODUCTION

This report is the first in a new series of annual marriage statistics publications. Statistics for all municipalities are included in the report for the first time.

The tables have been changed from previous publications in content and format to facilitate more rapid reproduction and distribution of the data as it becomes available. This edition of the annual marriage statistics report is part of an extended series of separate publications of similar format for births, deaths, abortions, and morbidity. It is hoped that the user will find the new format more informative and easier to reference.

Statistics provided in this publication are summarized items reported on marriage certificates filed with the New Jersey State Registrar. Marriages are tabulated by place of occurrence. All individual identifiers are removed prior to tabulation of data for statistical purposes.

OVERVIEW

In 1979, the number of marriages in New Jersey increased for the second consecutive year. Reaching a level of 54,740, the number of marriages increased 1,747 or 3.3 percent from 1978 to reach the highest volume since 1969. The rate per 1,000 population was 7.5, an increase of 0.3 from the previous year's level to the highest rate of marriages to population since 1974.

The greatest number of marriages (6,665) occurred in Essex County. Cape May County reported the highest marriage rate, 8.6. Other counties reported marriages ranging from a low of 454 in Salem County to a high of 6,206 in Bergen County, and rates ranging from 6.3 in Ocean County to 8.1 in Essex and Passaic Counties. When compared with 1978, marriage rates increased in 15 of the 21 counties, remained constant in two, and declined in four.

MARRIAGE RATE
1965 - 1979

AVERAGE AGE AT MARRIAGE
1965 - 1979

Average age at marriage declined slightly for both women and men. The average age for men dropped 0.3 points to 29.1, the 1977 level. The average age for women fell 0.4 points to 26.3, the same level recorded in 1976.

The number of women and men marrying before age 25 continued to decline. In 1979, 55.8% of the women married before age 25, down from 57.2% in 1978 and 72.1% in 1970. The percentage of men marrying before age 25 was 39.5% in 1979, a decrease from 40.6% in 1978 and 57.3% in 1970.

Although the average age at marriage declined, the proportion of women and men who were previously married continued to increase. Of all men married in 1979, 27.7% were previously wed, an increase of 0.6% from the previous year. Data show that 24.6% of the women were previously married, an increase of 0.3% from 1978.
